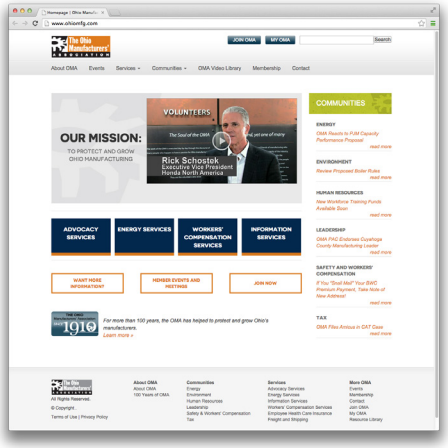
ACCESS DATA & ANALYSES THAT SUPPORT YOUR MANAGEMENT DECISIONS

WORKERS' COMPENSATION CLAIMS MANAGEMENT TOOLS FOR OHIO MANUFACTURERS

We organize your company's workers' compensation data and provide customized reports to help inform and support your management decisions.



How to access your reports

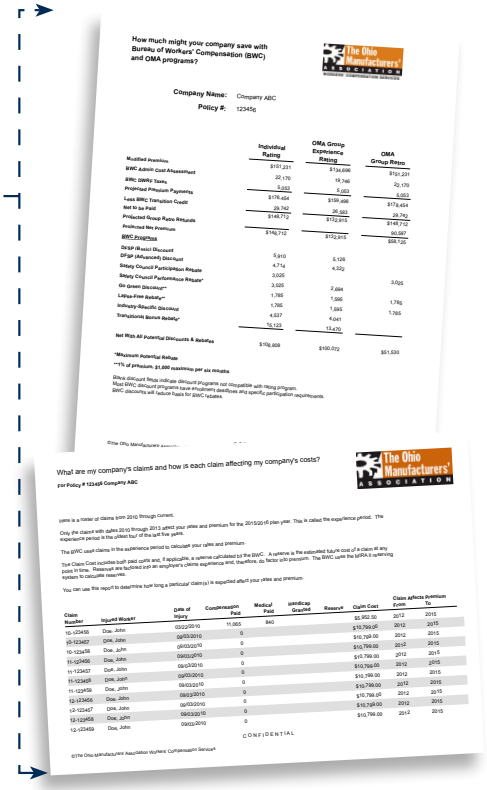
1. Go to www.ohiomfg.com and click on **My OMA**
2. Use your existing login, or create one
3. Follow online prompts to view reports and authorize others in your company to do so

Notes:

Due to the sensitive nature of workers' compensation information, only the OMA's key contact in your company is authorized to view your reports and – through My OMA – authorize others to view your company's reports.

In order for reports to be accessible, OMA needs your authorization through a current BWC AC3 (temporary) or AC2 (permanent) authorization form.

Reports are updated quarterly as the BWC releases fresh data.



Here are just some of the reports you'll have access to:

- How much might my company save with Bureau of Workers' Compensation (BWC) and/or OMA programs?
- What are the key drivers of my company's workers' compensation rates and premiums?
- What is the projection of my company's costs if my company did not opt into any premium-reducing programs?
- What are my company's claims and how is each claim affecting my company's costs?
- What claims might be settled to reduce my company's costs?
- What handicap reimbursement evaluations has OMA made to reduce my company's costs?
