Current research tells us that in 2021 we can expect up to a 20% turnover of the workforce, “The Great Covid Churn.”

Even those highly engaged people who have stayed with us are tired, emotionally exhausted and will work hard to find some sense of control over their lives since they have had so little control for over a year.

Research tells us many are waiting for just a bit more stability and then they will be ready to leave; the majority may already be looking.

As we continue to re-emerge, now is the time to double-down on your people strategy.
