

Noise! OSHA Requirements and Noise-Related Health Risks

Mark your calendar for this 60-minute webinar

DATE: Thursday, July 1, 2021

TIME: 10 – 11 a.m.

Hearing loss is one of the most common work-related illnesses, yet it is an often-overlooked workplace hazard.

What does OSHA 1910.95 really require? And how can you protect workers from noise-induced hearing loss? Can you use the sound level meter app on your phone to measure sound levels?

During this webinar, we'll cover all this and the following key topics:

Key Topics

- What are the health effects of exposure to high levels of noise?
- How do I know if our associates are exposed to high noise levels?
- What are Ototoxins?
- What does OSHA require if our associates are exposed to high noise levels?
- Is hearing loss recordable (e.g. should you record hearing loss diagnoses on your OSHA 300 log)?

Who should attend?

- ✓ EH&S managers
- ✓ Human resources and training managers
- ✓ Operations and production managers

Registration fee (for an unlimited number of participants at one phone/computer location):

1. OMA Workers' Compensation Services Members: **No charge**
2. All other OMA Members: **\$29**
3. Non-OMA Members: **\$39**

Your Safex Presenter

Beth Angus MPH, CIH is a Board-Certified Industrial Hygienist with more than five years of consulting experience with numerous clients. Her current projects include supporting a large plastics manufacturer with its exposure assessment programs and providing regular on-site staff support to a large laboratory facility, which includes performing laboratory hood certifications and safety equipment inspections. She also spent six months supporting a health care facility as it implemented new safety programs to address the COVID-19 pandemic.

Beth is the 2020 winner of the American Conference of Government Industrial Hygienists' John J. Bloomfield Award, which is presented annually to a young industrial hygienist who has made significant contributions to the profession by pursuing occupational health hazards, primarily through fieldwork.
