

# Job Hazard Analysis (JHA): Identifying Hazards and Implementing Safety Controls

**Mark your calendar for this  
60-minute webinar**

**DATE: Thursday, August 5, 2021**

**TIME: 10 – 11 a.m.**

OSHA defines a job hazard analysis (JHA) as a *technique* that focuses on *job tasks* as a way to identify hazards *before they occur*. JHA focuses on the relationship between the worker, the task, the tools, and the work environment. Ideally, after you identify uncontrolled hazards, you will take steps to eliminate or reduce them to an acceptable risk level.

In this webinar, we'll cover the basics of JHA and how utilize JHA to mitigate hazards.

## Key Topics

- What is a JHA?
- Why is it important?
- Steps to complete a JHA
- Incorporating JHA into daily operations

## Who should attend?

- ✓ EH&S managers
- ✓ Human resources and training managers
- ✓ Operations managers

**Registration fee** (for an unlimited number of participants at one phone/computer location)

1. OMA Workers' Compensation Services Members: **No charge**
2. All other OMA Members: **\$29**
3. Non-OMA Members: **\$39**

## Your Safex Presenter

**Brian Basbagill**, CSP, Board-Certified Safety Professional with 24 years of experience. Brian has comprehensive safety experience in both manufacturing and construction industries. He has conducted audits, supervised EH&S staff, and trained management and EH&S professionals. During his career, he has conducted or supervised hundreds of hazard assessments, written and reviewed compliance programs, and developed and presented employee and management training courses.

Since 1997, Brian has followed his passion for working with employees to identify hazards in their work environments and processes, and evaluating and identifying control measures to eliminate or reduce risks to workers. He takes pride in explaining how hazards may impact an employee and explaining why controls, training, procedures, and behaviors are critical to a safe workplace.
