

Workers' Compensation Claims Management 101

**Mark your calendar for this
60-minute webinar**

DATE: Wednesday, September 22, 2021

TIME: 10 – 11 a.m.

Even if you have a workers' compensation third party administrator (TPA) – like OMA Workers' Compensation Services – to help you manage claims and save on your Bureau of Workers' Compensation (BWC) premiums, someone in your company is still responsible for certain day-to-day claims management tasks. If you are new to -- or inexperienced in -- claims management, this webinar is for you!

We'll leave time for Q&A!

Key Topics

- The steps to take (after you've provided prompt medical attention for your injured or ill worker) when a claim – or an alleged claim – occurs, including the "paperwork" you need to process;
- Problems that sometimes surface when an injury occurs, and a claim is filed;
- The parties involved and their roles (BWC, employer, injured worker, TPA, Managed Care Organization (MCO), Industrial Commission);
- Claim cost management through salary continuation and light duty; and
- Handling disputed or rejected claims.

Who should attend?

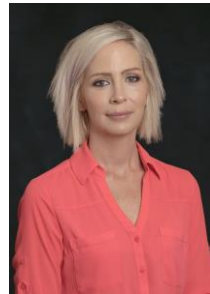

- ✓ Workers' compensation managers
- ✓ Claims managers
- ✓ Human Resource managers

No registration fee!
