

Driving Safely, Inside and Out

**Mark your calendar for this
60-minute webinar**

DATE: Thursday, November 14, 2019

TIME: 10 – 11 a.m.

Year after year OSHA violations involving powered industrial trucks (PITs) are among the top 10 most commonly cited standards. In 2019, PIT violations were the seventh most frequently cited among all violations.

Additionally, insurance carriers are beginning to emphasize fleet safety programs due to increased losses resulting from on-the-job accidents, which are not limited to over-the-road haulers but include sales teams and office staff.

And, according to the National Safety Council, "Off-the-job crashes account for 80% of employer crash-related health benefit costs, and half of crash-related injuries cause employees to miss work."

This webinar will focus on powered industrial truck drivers and non-CDL company drivers.

Key Topics

- PIT training and retraining
- Elements of a Fleet Safety/Driver Safety program, including motor vehicle record reviews and incident reporting
- Common distracting factors and behaviors
- Vehicle maintenance and best practices
- Driver training and effective communication

Who should attend?

- ✓ Safety and EH&S managers
- ✓ Human resources and training managers
- ✓ Operations managers
- ✓ Warehouse and fleet managers

Registration fee (for an unlimited number of participants at one phone/computer location)

1. OMA Workers' Compensation Services Members: **No charge**
2. All other OMA Members: **\$29**
3. Non-OMA Members: **\$39**
