

## **Why OMA Highly Recommends Health Management Solutions, Inc. (HMS)**

OMA and HMS are independent entities and have no common ownership; OMA endorses HMS based entirely on its quality of service.

HMS, unlike most Ohio MCOs, is medical-provider owned.

Its parent company is ProMedica, a regional health care system established in 1986, whose mission is to *improve your health and well-being*.

ProMedica and HMS have a medical excellence philosophy. Most Ohio MCOs are owned by workers' compensation third party administrators, not medical organizations.

The HMS medical director is Dr. Kevin F. Smith, M.D., M.P.H., a residency trained physician in Occupational Medicine. This means that the medical oversight, leadership and ongoing staff training at HMS are specific to work-related injuries and illnesses.

**The bottom line is:** When HMS is your MCO, your employees' medical management is the upper most concern and focus.
