

*A U.S. Department of Energy Sponsored Program*

## INDUSTRIAL ASSESSMENT CENTER

# Free Energy Audits for Industrial Facilities

THE UNIVERSITY OF DAYTON Industrial Assessment Center is one of 24 IACs funded by the U.S. Department of Energy (DOE) to conduct FREE energy assessments for small to mid sized manufacturers.

## ABOUT US

Since 1981, the UD-IAC has helped over 850 small to mid-sized industries reduce energy costs and stay competitive.

As part of an assessment, a small team of faculty and graduate students trained in industrial best practices will visit your facility for a single day and compile a customized report with recommendations for reducing energy costs.

Our energy assessments typically identify energy savings opportunities that reduce total annual energy usage, cost, and associated carbon emissions by 10-15%.

## HOW TO QUALIFY

To qualify for a free assessment, your plant must have:

- SIC Code between 2000 - 3999
- Annual energy bills between \$100,000 - \$2.5 million
- No professional in-house staff to perform an assessment

And either:

- Gross annual sales below \$100 million, or
- Fewer than 500 employees
