

Learning EV industry terms

1. Hybrid _____

2. Amps _____

3. Green _____

4. Watts _____

5. Energy _____

6. Battery _____

7. Plug _____

8. Charge _____

9. Brakes _____

10. Motor _____

11. Power _____

12. Volts _____

A. Where an EV's power is stored. Equivalent to a gas tank.

B. Makes the electrical connection for the EV and power supply.

C. The electrical heart of an EV.

D. A measurement of electrical force.

E. A vehicle that uses both electric motor and internal combustion engine to achieve better efficiency.

F. Slows a vehicle, regenerative or traditional for EV and hybrids.

G. A measure of how much energy is used in a span of time.

H. A measurement of electrical power. The final electrical output.

I. To make less harmful or more sensitive to the environment.

J. A measurement of electrical current.

K. Amount of energy or electrons that pass from one body to another.

L. Force on electrically charged particles and the movement of those particles.

ANSWER KEY: 1-E, 2-J, 3-I, 4-H, 5-L, 6-A, 7-B, 8-K, 9-F, 10-C, 11-G, 12-D
